# APPLICATION GUIDE

## HOW TO DETERMINE CORRECT FITMENT

Check these 3 factors below to insure you order the correct lugs

### 1 THREAD SIZE

Take the outside diameter of the wheel stud across the threads. West Coast lugs will have this engraved onto each of them. Its easiest to use a thread Pitch gauge to identify thread size.

Common Sizes: (US) 7/16", 1/2", 9/16"  
(Metric) 10mm, 12mm, 14mm, 15mm, 16mm

### 2 THREAD PITCH

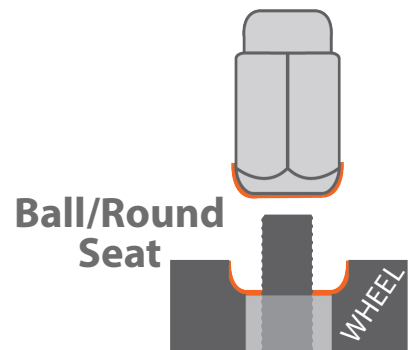

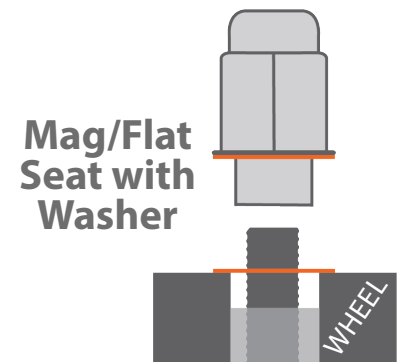

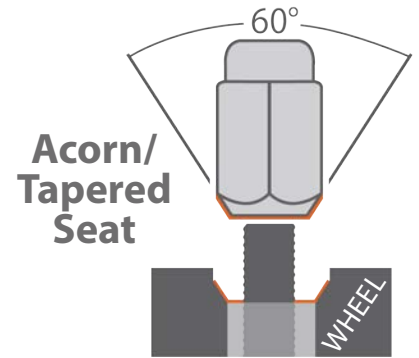

**US (inch)** - Measure the number of threads per inch.

**Metric (mm)** - Measure the distance in millimeters between thread peaks.

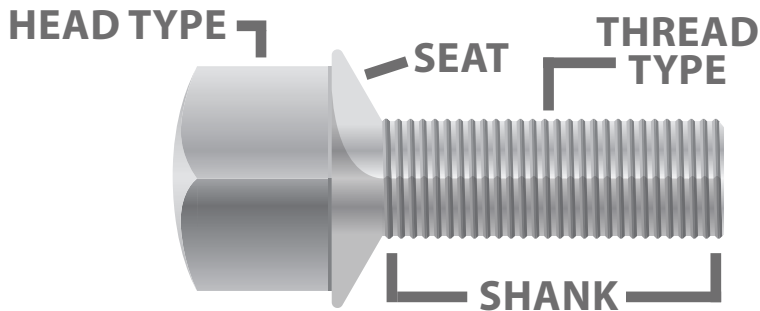

### 3 SEAT TYPE

This is how the lug nuts engage to the wheel surface. conical seat (aka acorn/tapered) lug nuts are the most common. Mag seat lugs feature a flat lug nut seat and generally comes with a separate washer. Ball seat lugs feature a round seat.

## SEAT TYPES

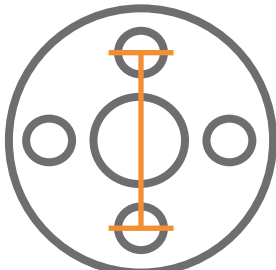

## LUG PARTS

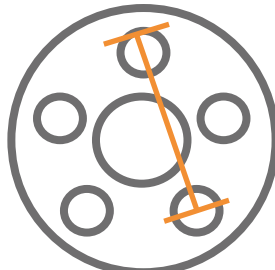

## MEASURING BOLT PATTERNS

4 LUG

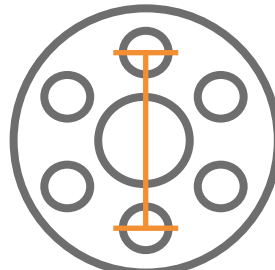

Middle of 2 holes directly across from each other

5 LUG

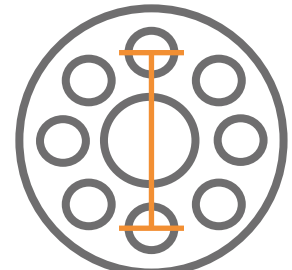

Back of hole to the center of the 2nd bolt hole

6 LUG

Middle of 2 holes directly across from each other

8 LUG

Middle of 2 holes directly across from each other

# HEX LUG NUTS

## HEX LUG NUTS & INSTALL KITS

- Precision machined threads
- Cold forged & heat treated to provide dependable strength & reliability
- Triple plated to provide exceptional strength, corrosion resistance & an attractive appearance

# WHEEL SPACERS

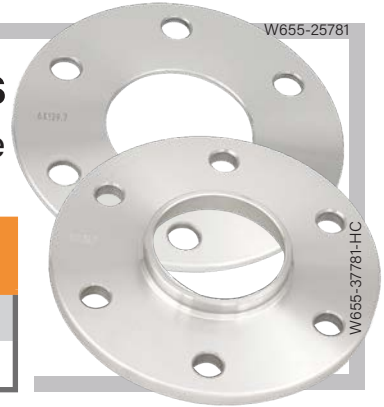

## HUB CENTRIC SPACERS

- Made from billet aluminum – superior strength and hardness
- Anodized surface for rust and corrosion resistance
- CNC machined hubcentric centerbore provides perfect fit and prevents wheel vibration
- Perfect fix for minor clearance issues

### GM Hub Centric Spacers

6 Lug | 2 Per Box, 25 Boxes Per Case
